## LABEL AND FLEXIBLE PACKAGING

# ANY-PRESS

CMYK+W 13 INCH LABEL & PACKAGING PRESS

# YOUR ADVANTAGES AT A GLANCE

## ONE MACHINE, DUAL USES

Do more with one machine. This all-in-one device handles labels and flexible packaging. With a wide 13-inch format and built-in laminator, it enables easy production of labels and pouches.

## MORE BENEFIT WITH LESS BUDGET

At the affordable price, you can get 5-color printer & laminator for your label & flexible packaging business. This will alleviate your financial burden of upfront investment cost when you start a new short-run printing project.

## LOWER YOUR TOTAL COSTS

What makes a label? ANY-PRESS propose you the most cost-effective ways of making labels. The high-capacity toners and drums and wider choices of media offer you the most competitive manufacturing cost of label for your daily business.

## POWERFUL PRINTING FUNCTIONS

ANY-PRESS adopts a powerful operating system, ANY-FLOW, to enable to manage colors, variable data into your design and print them all at once. You can print and cut your labels through this powerful software like high-end presses.

## SMALL FOOTPRINT

ANY-PRESS is impressively compact. It can fit easily in limited office space. Lower power consumption with single phase electricity.

## CMYK+ WHITE PRINTING

ANY-PRESS, with white toner support, allows production of distinct labels and pouches, offering sharper images and text on colored papers, including kraft and transparent labels.

## VARIOUS MEDIA SUPPORT

Print labels on diverse materials like art paper, PET, and PP with LED laser low-temperature toner, avoiding costly coated media. Achieve smudge-free printing on kraft paper for eco-friendly labels and pouches.

## ONE-STOP LAMINATION

You can accomplish multiple tasks without the need for coating twice using a separate laminating machine. From printing labels and pouches to laminating, you can complete all these tasks in one go.

## DURABLE LABEL PRINTING

Utilize LED laser toner printing for coating-free labels and pouches with superb environmental resistance. They exhibit remarkable durability, with exceptional water, UV, and scratch resistance, and resilience to external conditions.

## EASY OF USE

Easy to operate, no need for professional technicians, reducing labor costs. With just three days of training, anyone can become a digital printing specialist.

## LAMINATION & LINER REMOVAL

**(Max. roll diameter 300mm)**
Laminating and liner removal are built-in features, allowing for immediate laminating after printing.

## CMYK+W LASER ENGINE WITH LED TECHNOLOGY

**(Max. web width 330mm / Max. printable width 324mm)**
It prints with a 324mm maximum width, using a durable LED laser engine and supporting white color printing on colored and clear media.

## SPLICE TABLE

Allows the operator to firmly clamp the leading end of a new roll to the trailing end of an expired roll.

## UNWINDING SYSTEM

(Max. roll diameter 350mm)
It supports a high-capacity media and can print up to 500M.

## REWINDING SYSTEM

Printed media are easily rewound in an automatic mode. The media guide can support various media widths.

## EXCLUSIVE SOFTWARE 'ANY-FLOW'

ANYTRON software is optimized for color label printing, providing fast rendering for large-volume printing and easy creation of variable data like barcodes and QR codes.

- Trap function for color registration
- Advanced media saving
- Merge print(nesting)
- Making eye mark(black mark)
- Variable data printing(barcode, qr code etc.)
- White color printing (background and spot color)
- Spot color change
- Cost calculation& consumables lifetime check

# VERSATILE APPLICATIONS
